Procedure and Qualification Mode of the Competition

The registration deadline for the Online Competition 2024/2025 is October 31, 2023.

After the registration deadline, all teams will get access to the online software and virtual kick-offs.

The **Online Course "Financial Basics"** provides basic business finance and managerial accounting which can be worked on individually, especially as a preparation. It is an integrated part of the program for all participants and accessible via the MARGA software.

During the **test round** it is possible to become familiar with the MARGA model without affecting the actual qualification process. After the **two test periods** all teams restart the simulation on the basis of the already known initial situation, but with new direct competitors.

Thereafter, the real qualification mode begins with the **main round**. The objective is to increase the **MARGA Value Added** (**MVA**) of your company over all periods of the main round and to leave your competitors behind. In the end, the **best 4 group** winners will qualify for the final.

For the **final** we will come up with a new and challenging initial situation. Another **five periods** will take place online as usual. The last period of the final round will be played and simulated during the **two-day online final**. The announcement of the winning team takes part on the second final day where also guests of honor will be invited.
